

Sun Protection Policy

Help for non-English speakers

If you need help to understand the information in this policy please contact the administration office.

Purpose

The purpose of this policy is to support sun protection behaviours at Aitken Creek Primary School to minimise risk of health problems from sun overexposure, including skin cancer.

This policy provides guidelines to:

- support staff and students to use a combination of sun protection measures when UV index levels are 3 or above (generally mid-August – end of April)
- ensure that there are outdoor environments that provide adequate shade for students and staff
- ensure students are encouraged and supported to develop independent sun protection skills to help them to be responsible for their own protection
- support our school's strategies to meet its duty of care and occupational health and safety obligations to minimise harmful UV exposure and associated harm for students and staff.

Scope

This policy applies to all school activities, including camps and excursions. It is applicable to all students and staff.

Policy

Overexposure to the sun's ultraviolet (UV) radiation can cause health problems including sunburn, damage to skin and eyes, and an increased risk of skin cancer. UV damage accumulated during childhood and adolescence is strongly associated with an increased risk of skin cancer later in life.

UV radiation:

- cannot be seen or felt
- can be reflected off surfaces such as buildings, asphalt, concrete, water, sand and snow
- can pass through light clouds
- varies in intensity across the year (highest in Victoria from mid-August – end of April)
- peaks during school hours

Sun safety is a shared responsibility and staff, parents and students are encouraged to implement a combination of sun protection measures whenever UV levels reach 3 and above (typically from mid-August to the end of April in Victoria). Information about the daily local sun protection times is available via the free [SunSmart app](#), or at sunsmart.com.au or bom.gov.au.

Aitken Creek Primary School has the following measures in place for all outdoor activities during the daily sun protection times to help reduce the risk of over-exposure to UV radiation for staff and students.

Shade

Aitken Creek Primary School provides sufficient options for shelter and trees to provide shade on school grounds, particularly in places such as: near the canteen, areas where outdoor lessons can be held and popular play areas.

Students are encouraged to use available areas of shade when outdoors during peak sun protection times, particularly if they do not have appropriate hats or outdoor clothing.

When building works or grounds maintenance is conducted at Aitken Creek Primary School that may impact on the level of shading available to staff and students, a review of the shaded areas available will be conducted and further shading installed as appropriate.

Sun protective uniform/clothing

Aitken Creek Primary School's uniform and dress code includes sun-protective clothing, including:

- loose, cool, closely-woven fabric
- shirts with a collar and/or high necklines
- tops with elbow length or long sleeves
- longer style shorts and skirts
- rash vests or t-shirts for outdoor swimming activities.

Aitken Creek Primary School's uniform applies on and off-site unless otherwise advised. When students are not required to wear school uniform (such as school camps, free dress day), Aitken Creek Primary School will ensure steps are taken to encourage students to wear sun-protective clothing whenever UV levels reach 3 and above.

Hats

From mid-August (exact date to be set by the school annually) to 30 April, all students **must** wear a sun protective hat that shades the face, neck and ears for all outdoor activities. Hats may also be worn for all outdoor activities outside of the August to April time period, by parent or student choice.

Students are required to wear a school hat or another hat style that protects the face, neck and ears when outdoors, for example broad-brimmed, legionnaire or bucket. Baseball or peaked caps and sun visors are not considered a suitable alternative, as they do not protect the ears, cheeks or neck. Students who are not wearing appropriate protective clothing or a hat will be asked to play in the shade or in a suitable area protected from the sun.

Reasonable adjustments can/will be made for religious reasons.

Sunscreen

Aitken Creek Primary School encourages all staff and students to apply SPF30 (or higher) broad-spectrum, water-resistant sunscreen daily whenever UV levels reach 3 and above. Sunscreen should be applied at least 20 minutes before going outdoors, and reapplied every two hours (or more frequently if sweating or swimming).

Staff and families should role model SunSmart behaviour and are encouraged to supply SPF 30 (or higher) broad-spectrum, water-resistant sunscreen for students to apply when outside.

Curriculum

Students at our school are encouraged to make healthy choices. They are supported to understand effects of sun exposure and are encouraged to be involved in initiatives to promote and model sun protection measures to the whole school. Aitken Creek Primary School will address sun protection and UV safety education as part of Health and Physical Education sessions.

Staff role-modelling and OHS

Staff are encouraged to access resources, tools, and professional learning to enhance their knowledge and capacity to promote sun smart behaviour across the school community.

UV radiation exposure is considered as part of our school's risk management and assessment for all outdoor events and activities, i.e. UV radiation protection strategies are included in school camp activities, excursions, sports days and interschool sports events.

Families and visitors

Families and visitors participating in and attending outdoor school activities are encouraged to:

- wear a sun-protective hat, covering clothing and, if practical, sunglasses; ●
- apply SPF30 (or higher) broad-spectrum, water-resistant sunscreen; and ●
- seek shade whenever possible when outdoors.

Community engagement

Sun protection behaviour is regularly reinforced and promoted to the whole school community through newsletters, school website/intranet, staff and parent meetings, school assemblies, student and teacher activities and at student enrolment/new staff orientation.

Families, students and staff are provided with information, ideas and practical strategies to support UV safety at school and at home.

Communication

This policy will be communicated to our school community in the following ways:

- Available publicly on our school's website
- Included in staff induction processes and staff training
- Included in staff handbook/manual
- Discussed at staff briefings/meetings as required
- Included in transition and enrolment packs
- Discussed at parent information nights/sessions
- Reminders in our school newsletter
- Discussed in student forums
- Hard copy available from school administration upon request
